

## Environmental Specialist, Remediation Westwood MA or Berlin CT

### Job Description:

This position Formulates, plans, coordinates, and manages technically sound and cost effective environmental site assessment and remediation. Conducts field work and/or oversees consultants and contractors across three states involved in property due diligence evaluations, preparation of remedial action and implementation plans; and management of remediation activities to achieve site closure under cleanup laws and regulations. Analyzes and interprets data; writes reports and prepares presentations; manages project budgets and corporate reserve accounts. Interfaces with a variety of Eversource personnel, legal counsel, and regulatory agency staff; and have a working knowledge of environmental regulations in Connecticut, Massachusetts and New Hampshire.

- Oversee site assessment and remediation activities ensuring strict compliance with applicable state and federal rules. Manage contracts, including specifications and bid documents, Request for Proposals (RFP) coordination, and environmental consultants and vendors.
- Ensure property pre-acquisition and sale environmental due diligence activities are in accordance with ASTM and standard industry practices.
- Accountable for budgets associated with site assessments, remediation and property due diligence
- Attend public hearings, public meetings and other forums as needed.
- Coordinate responses during reviews by both internal and external auditors.

### Qualifications:

- Technical Knowledge/Skill: Strong working knowledge of the state and federal rules associated with site assessment and remediation, as well as ASTM Environmental Due Diligence. Strong Organizational skills are required.
- Education: Bachelor's degree in Engineering, Environmental Science or related field; Masters degree in Engineering, Environmental Science or related field preferred.
- Experience: Minimum of 8 years of utility environmental remediation experience (in either industry or consulting) preferred. Experience with state environmental regulations in Massachusetts, Connecticut and/or New Hampshire preferred.
- Licenses & Certifications: Possession of certification as CT Licensed Environmental Professional, MA Licensed Site Professional and/or NH Professional Geologist a plus.
- Working Conditions: Fast paced working environment with multiple projects and stakeholders. The job requires travel throughout the Eversource service territory of Massachusetts, Connecticut, and New Hampshire to support projects objectives and actively coordinate with a decentralized staff. Attendance at some night meetings may be required. Applicant must have a valid driver's license and a personal vehicle. Primary reporting location: Berlin, CT or Westwood, MA.
- Problem Solving & Complexity: Many issues are complex and will require assessment against regulatory requirements with Environmental Affairs leadership and legal counsel.
