

## About the Speaker

Mr. Robin Boyd, PG, is a Senior Geologist with AECOM's Honolulu office, who lives and works in Virginia. Robin has 30 plus years of experience conducting soil and groundwater investigations as well as designing and implementing a variety of remedial technologies under many regulatory jurisdictions. He took his first 4-day course on Multi Increment Sampling nearly 12 years ago and has been designing and conducting Multi Increment Sampling investigations ever since. Mr. Boyd has implemented incremental sampling on over 40 projects and assisted on many others with site-specific sampling designs. Mr. Boyd has conducted numerous seminars and meetings on incremental sampling as well as presented at workshops attended by consultants, state and federal regulators, and PRPs. In addition, he was a contributing author on the ITRC guidance document *Incremental Sampling Methodology*, published in 2012, and currently serves as a trainer on the ITRC document.
