Steve Mabee, PhD, PG, the State Geologist writes:

Dear Fellow Geology Enthusiasts,

We are very pleased to announce the formation of the Massachusetts Geological Society. We urge anyone with a passion for geology, or even just an interest, to join and become a member.

The first organizational meeting will be held on June 4, 2015, in the evening, at the offices of AECOM in Chelmsford, MA. This will be followed by a field trip run by Lindley Hanson on Saturday July 18, 2015. We will post more information about these events - time, location, directions, etc. - to the web site at a later date.

Joining is easy and inexpensive. Attached is a [membership form](#) and my [personal invitation](#) to join the MA Geological Society.

Please feel free to spread the word and forward this email.

If you have any questions, please don't hesitate to contact geoinfo@massgeosociety.org for more information.

On behalf of the Massachusetts Geological Survey and the organizing committee, I look forward to seeing you on June 4.

Steve
