

Patrick D Corcoran, LSP

I am a Senior Project Manager at EnviroTrac's Sharon, Massachusetts office, and have been an environmental consultant for 24 years. I have been an LSP for 18 years. I am also a Grade 6 licensed wastewater treatment operator. I have managed a wide range of environmental assessment and remediation projects for major petroleum retailers, industrial manufacturers and other commercial clients, developers, attorneys, insurance companies, and public organizations. I also mentor junior staff and strongly encourage their professional growth, including inviting them to attend LSPA monthly meetings, and attend LSPA courses.

I have been a member of the LSPA since 1998. I served on the Education Committee since 2003, including as Chair for 2013-2014. My involvement with the LSPA has been a critical component of staying current on the state-of-the practice, and I welcome the opportunity to continue to work with the organization's committed leadership. I thank the LSPA Board for the nomination and the opportunity to serve on the Board, and look forward to diligently providing direction and advocacy for the LSPA membership. With your vote, I would like to see the organization expand its exceptional educational program to professions related to LSPs' work, maintain and enhance the financial viability of the organization, and advocate professional dialogue.

Marilyn Wade, LSP

I am a Managing Engineer for Brown and Caldwell. I am currently finishing my first ever term on the LSPA Board of Directors, and for the last two years have served as the association's Treasurer. I have enjoyed every bit of my time on the Board and would be honored to continue to serve the membership in this role for a second term. Among my accomplishments during my tenure as Treasurer, I am most proud of the completion of our first full outside audit, for which we received top grades.

In an environmental professional career that spans three decades I have worked in industry for a major oil company, as a regulator with U.S. EPA Region 1 and for the past 20 years as a consultant. My experiences have encompassed a myriad of projects, from multi-year multiple phase major Superfund and MCP remediation projects to due diligence, UST and compliance sites and portfolios. I have been active in the LSPA over the past decade, and prior to serving on the Board I have served on and co-chaired the Regulations Committee, coordinating the review and response to the 2014 MCP update and to various MassDEP proposed policies and guidance. I work diligently to communicate with the MassDEP regulators and understand their priorities and I have served on numerous LSPA/MassDEP workgroups to foster productive and efficient changes to the regulatory framework that defines our practice. I enjoy the mixture of technical challenges and policy setting approaches that the LSP practice and the LSPA offers. Best of all is the opportunity to work with some of the qualified and innovative professionals in the waste site cleanup business.

My sincere thanks go out to the LSPA Nominating Committee for this opportunity to continue my service to the LSPA by joining the Board of Directors. If elected, I will bring to the board my enthusiasm for meeting the challenges ahead and I look forward to serving the membership and working closely with the current distinguished board members and past presidents.

Matthew Young

I have worked in the environmental industry for over 11 years as an environmental consultant/scientist and environmental project manager. I currently am a Senior Project Manager in the Environmental Affairs Department of Cumberland Farms, Inc. (CFI). At CFI, I am responsible for managing and collaborating with a team of consulting firms on a portfolio of varied projects in Massachusetts, New Hampshire, and Maine. These projects include investigation and remediation of impacted properties, investigating and analyzing real estate transactions, and supporting new store construction through remediation, risk reduction, and soil management practices. Prior to CFI, I worked as an environmental consultant serving customers in retail petroleum, insurance, and property development industries. I have a Bachelor of Science degree in Chemistry-Geology from Bridgewater State University and a Master of Science degree in Project Management with a specialization in Geographic Information Systems from Northeastern University.

I have been an active participant in the LSPA working with the Regulations Committee for 5 years and served as co-chair the last three years. During this time, I have worked with outstanding co-chairs, committee members, and LSPA membership to review and provide comment on regulatory changes such as the 2014 MCP Regulatory Reform, MassDEP Guidance documents (Activity and Use Limitations, Vapor Intrusion, Light Non-Aqueous Phase Liquid), and Similar Soils/Soil Management. In addition, the Regulations Committee has worked to communicate regulatory and industry updates through e-mail and newsletter summaries of MassDEP Bureau of Waste Site Clean-up (BWSC) meetings, such as the Strategic Advisory Committee meetings. I am honored and excited for the nomination to the LSPA Board of Directors. If elected, I plan to continue as an active member of the Regulations Committee, expand opportunities for advocacy and proactive regulatory and technical discussions, enhance communication to the LSPA membership, and work with the LSPA leadership to continue to provide industry leading services to the membership. Thank you for your consideration.
