

LSP ASSOCIATION CONTINUING EDUCATION SEMINAR
Long-Term Monitoring Optimization for Groundwater Remediation Using MAROS
Westford Regency Inn & Conference Center, 219 Littleton Road, Westford, MA

DESCRIPTION: This 1-day course is intended to provide technical personnel a comprehensive understanding of Long-Term Monitoring Optimization (LTMO), its place as part of comprehensive remediation optimization and its potential cost savings during long-term site operation and maintenance. Basic concepts and terminology will be integrated with hands-on instruction using the Monitoring and Remediation Optimization System (MAROS) software. The course will include a series of detailed case studies and software exercises. Participants will be shown how to incorporate MAROS to help develop robust and cost effective characterization and/or remediation decisions. Course attendees are expected to have a general technical background or understanding of environmental site management and contaminant hydrogeology.

IMPORTANT: This is a computer software course. Participants should bring a laptop and USB drives, although sharing of laptops will be encouraged during the course. The laptop should have the operating systems Win-XP or Vista and Excel 2003, Excel 2007 or Excel 2010 must be installed. A link to the software will be emailed to each registrant following registration and prior to the course. **NOTE:** There is no charge to obtain and download this software onto your computer.

Course participants should use the following link to download and install the course software:

<http://www.gsi-net.com/en/software/free-software/maros.html>

*This course has been approved by the LSP Board for 8.0 hours of "technical" continuing education credits (Course #1438) and will be submitted for CT-LEP and NYPE credits. This is a **new** course that has not been previously offered.*

INSTRUCTORS: Shahla K. Farhat, PhD., and Mindy Vanderford, PhD., GSI Environmental, Inc.

A course description and presenter biography is available at:
